Education

Graphic Era University

B.Tech in Computer Science & Engineering

2021 - 2025

8.19/10 CGPA

Projects

- **E-commerce Website** : Developed a dynamic E-commerce site using the MERN stack. Specialized in optimizing performance and enhancing user experiences. Implemented an intuitive admin panel empowering the owner to effortlessly add and manage products.
- **Chat APP** : This chat application leverages the MERN stack along with Socket.IO for real-time communication. Users can engage in live chat sessions, with messages instantly delivered to all connected clients. The application's frontend is developed with React.js, while the backend utilizes Node.js and Express.js, with MongoDB serving as the database.
- **Weather App** : This project utilizes the OpenWeather API to fetch real-time weather data for a given city. Users can search for a city, and the application displays information such as temperature, humidity and wind speed.

- **Gym-Website** : Developed frontend for gym using React.js, Html, Css and Javascript.
[Link to Website](#)
- **Real-time Web Search Engine** : Developed a Web search engine that offers up-to-date search results by continuously crawling and indexing the web in real time using Google API key.

Technical Skills

Languages: C++, JavaScript, Java, c#, SQL

Backend: Node.js, Express.js

Frontend: React, TailwindCSS, HTML, CSS

Clouds & Databases: PostgreSQL, MongoDB, Oracle

Web Technologies:Socket.IO, Recoil

Developer Tools: Postman, VS Code, GitHub

Coursework: Data Structures and Algorithms (DSA), Database Management System (DBMS), Object-Oriented (OOPs), Operating Systems, Software Engineering, Computer Networks

Algorithmic Competitions/Achievements

- Solved over **500** DSA problems from Leetcode, Geeks for Geeks.
- Secured **3rd** Rank in **SIH** internal Hackathon .

Hobbies

Playing Sports like football, basketball, badminton and etc.

Playing video games.

Listening Music
